CollectiveXP

OWNERS & EXPERTS · EPISODE 7

7 questions: when to ask for help with something you vibe-coded

If something feels scary, you'll ask for help. This is for when nothing does. Answer each one yes or no. Yes means you've handled it.

		YES	NO
1	If the person who built it left tomorrow, could someone else fix it?	☐	☐
2	Are passwords and keys kept out of the code and out of spreadsheets?	☐	☐
3	If it broke at 2am, would you find out before a customer did?	☐	☐
4	Can you try a change without touching the live version?	☐	☐
5	Does it still work if two people use it at the same time?	☐	☐
6	Do you know what customer data and money it touches, and where it goes?	☐	☐
7	If it went down for a day, could the business keep running?	☐	☐

How did you score?

Mostly yes: keep building.

Only one or two: talk to an engineer you trust.
